

Smoke Detectors

It has been brought to our attention recently that the state site reviewers have a new item they are to look for when visiting your home.

The site reviewers are now expecting to see a working smoke detector in the kitchen area. If a smoke detector is not in that location, the reviewers are considering that to be a significant risk to your individual's health and safety.

We are requesting all Host Home Providers double check to ensure there is a smoke detector in the kitchen area. If you do not have one, please purchase a smoke detector and place it in your kitchen as soon as possible.

Our Host Home Coordinator, Cynthia, will begin checking for the smoke detector during her annual visit.

If you have any questions or need further information, please contact Cynthia Thompson at 281-997-2295 ext. 319.
